

The Aviator

A previs board and a visdev sheet for one generated character.

Personal project
ComfyUI, July 2026

01 Wide establish
face pass, unscored at 108 px

02 Full walk
face pass, unscored at 123 px

03 Crouch at landing gear
0.43 / 0.45, yaw 56°

04 Flight map
0.58 / 0.67, yaw 17°

05 Close-up at dusk
0.55 / 0.61, yaw 49°

06 Goggles insert
0.85 / 0.77, yaw 2°

07 Climbing into the cockpit
0.28 / 0.58, yaw 40°

08 Low angle, ready
Lightning pass, 0.58 / 0.56, yaw 14°

Reference
Every frame was conditioned on this image.

The board runs wide to tight and back out: 01 sets the place and her scale in it, 02 walks her to the aeroplane, 03 and 04 are the checks before a flight, hands on the gear and eyes on the map, 05 and 06 bring the camera to her face and then to the goggles, and 07 and 08 put her in the cockpit and look up with her. The reference carried the face. The prompt held everything else: the flight cap, the shearling jacket, the breeches and boots, and the light and lens for each shot. 03 came back outdoors at sunset and was kept, because the sequence is about her surviving the cut, not the set staying put.

Model	Qwen-Image-Edit 2511 in ComfyUI with the Qwen 2.5-VL text encoder. Shot 08 is a four-step Lightning pass of the same model.
Identity	Held by the model from the reference image, with a prompt per shot.
Checks	Every frame checked against the reference by score and by eye, two encoders under each frame. Three shots needed help and are marked.
Character	Synthetic throughout. The reference image was itself generated.

The Aviator

Hangar at dusk

Morning airfield

Night workshop

Aviator jacket

0.78 / 0.79, yaw 40°

0.71 / 0.79, yaw 32°

0.78 / 0.72, yaw 33°

Evening gown

0.82 / 0.77, yaw 29°

0.78 / 0.75, yaw 16°

0.79 / 0.76, yaw 23°

Coveralls

0.86 / 0.85, yaw 19°

0.56 / 0.61, yaw 41°

0.58 / 0.66, yaw 27°

Outfit down, lighting across, so one axis holds while the other moves: the same face in three keys, warm dusk with a cool rim, open morning sun and tungsten in deep shadow, and in three wardrobes that change the hair and the framing with them.

She holds through the jacket and the gown. The coveralls row is where she slips: the kerchief changes how the face is framed, and the two cells that read least like her are both there.
